BODY CONTENT

Header Tags

Your page is making good use of header tags.

HTML header tags are an important way of signaling to search engines the important content topics of your page, and subsequently the keywords it should rank for.

Header Tag	Frequency	
H1	1	<div style="width: 100%;"></div>
H2	1	<div style="width: 100%;"></div>
H3	4	<div style="width: 100%;"></div>
H4	0	
H5	0	
H6	0	

Keyword Consistency

Your page's main keywords are distributed well across the important HTML tags.

Your page content should be focused around particular keywords you would like to rank for. Ideally these keywords should also be distributed across tags such as the title, meta and header tags.

Your usability could be better

Your page is OK but could be more usable across devices. Usability is important to maximize your available audience and minimize user bounce rates (which can indirectly affect your search engine rankings).

Device Rendering

This check visually demonstrates how your page renders on different devices. It is important that your page is optimized for mobile and tablet experiences as today the majority of web traffic comes from these sources.

Flash Used?

No Flash content has been identified on your page.

iFrames Used?

Your page appears to be using iFrames. iFrames are discouraged as they can complicate navigation of content in mobile and have historically been harder to index for search engines. There are particular coding libraries however such as Google Tag Manager that require iFrames as part of their functionality.

Favicon

Your page has specified a favicon.

Performance Results

Your performance is very good!

Congratulations, your page has performed very well in our testing meaning it should be reasonably fast and responsive for users. Performance is important to ensure a good user experience, and reduced bounce rates (which can also indirectly affect your search engine rankings). Continue to monitor your performance over time to ensure there are no periodic fluctuations.

Page Speed Info

Your page's server response time is reasonably low which is good for load speed and user experience.

JavaScript Errors

Your page is not reporting any JavaScript errors.

Minification

All your JavaScript and CSS files appear to be minified.

Deprecated HTML

No deprecated HTML tags have been found within your page.

Inline Styles

Your page appears to be using inline styles. Inline styles are an older coding practice and discouraged in favor of using CSS style sheets, due to their ability to degrade page load performance and unnecessarily complicate HTML Code.

Social Results

Your social could be better

You do not appear to have a strong social presence or level of social activity (or we may just not be able to see your profiles!). Social activity is important for customer communication, brand awareness and as a marketing channel to bring more visitors to your website. We recommend that you have all of your profiles listed on your page for visibility, and work to build a following on those networks.

Facebook Connected

Your page has a link to a Facebook Page.

Facebook Open Graph Tags

Your page is using Facebook Open Graph Tags.

Facebook Pixel

We have not detected a Facebook Pixel on your page.

Facebook's Pixel is a piece of analytics code that allows you to track users retarget them with Facebook Ads in future.
